ANDY HUBER

ASPIRING NETWORK ENGINEER

Mesa, AZ | andyhuber31@gmail.com | linkedin.com/in/andyhuber31
Portfolio: andyhuber31.github.io

PROFILE

Mathematics graduate and operations professional with 7+ years of experience investigating discrepancies, applying controlled procedures, and coordinating resolution across teams. Developing hands-on Cisco routing and switching skills in a physical home lab while studying for the CCNA. Brings an analytical approach to troubleshooting, configuration verification, and clear communication.

HANDS-ON TECHNICAL PROJECT | CISCO HOME LAB

- Built a physical Cisco lab with 1921 and 2821 routers and 2960X, 2960, and 3560 switches; practice configuration and troubleshooting through the Cisco IOS CLI.
- Configure VLANs, 802.1Q trunks, router-on-a-stick, and multilayer-switch routing; use LACP EtherChannels and spanning tree to manage switching paths.
- Configure OSPF neighbors on VLAN 31 and HSRP gateways for VLANs 31 and 62; verify routing and active/standby roles with Cisco IOS show commands.
- Investigate connectivity using interface, trunk, routing-table, neighbor, and spanning-tree output; validate findings with ping and traceroute.

PROFESSIONAL EXPERIENCE

Client Consultant, Alternative Asset Servicing
Jan 2023 - Present

Northern Trust | Tempe, AZ

- Investigate investment and pricing data discrepancies, trace records across systems and workflows, and coordinate resolution with operations, pricing, audit, and governance teams.
- Execute control testing, verify evidence against defined requirements, and maintain accurate records of findings and corrective actions.
- Coordinate time-sensitive work across multiple stakeholders while balancing accuracy, procedural requirements, and clear status communication.

Senior Analyst, Client Audit
Jan 2019 - Jan 2023

Northern Trust | Tempe, AZ

- Audited and reconciled transaction feeds and valuation records across 60+ alternative asset portfolios, with zero material audit findings.
- Identified root causes of variances by comparing system records, source documents, and operational handoffs; documented findings and coordinated corrective action.

TECHNICAL FOUNDATION

Networking: TCP/IP, subnetting, Cisco IOS, VLANs, 802.1Q trunking, inter-VLAN routing, static routing, OSPF, HSRP, LACP, spanning tree, and SSH. **Verification:** ping, traceroute, interface and trunk status, routing tables, and neighbor analysis. **Professional strengths:** root-cause analysis, evidence review, quality control, and cross-team coordination.

EDUCATION & DEVELOPMENT

Bachelor of Science in Mathematics | Arizona State University | May 2018

Cisco CCNA: in progress | Google Data Analytics Professional Certificate: May 2025
